

Where *Speed Wins*

## Insurance Systems Integration Accelerator

■ **Data Bridges** – Between policy management, claims, and ratings systems ■ **Business Intelligence** – Create and populate a data warehouse with updated information from various sources

### THE PROBLEM & THE RESOLUTION

Manual processes, lengthy delivery cycles for critical business initiatives, and technology barriers hinder the speed with which the insurance industry conducts business. Carriers often find it frustrating, not to mention highly inefficient, to get disparate systems to share data. Problems like these slow the pace and achievable level of business results, but they don't have to any more.

Adeptia Insurance Accelerators directly address carriers' need for more immediate, more cost-efficient results. Adeptia's Accelerators integrate systems, speed up processes, reduce costs, reduce time to market, open the door to web services, and adapt to changing business scenarios with minimal IT intervention. Pre-built with industry standards and sitting atop Adeptia's BPM and Integration technology, they bring success faster and easier to carriers facing competitive pressures but constrained by legacy systems, limited IT resources and complex business processes.

### INSURANCE SYSTEMS INTEGRATION ACCELERATOR DELIVERS BUSINESS VALUE

Carriers often find that data exchange between policy management systems and other subsystems including rating, financials, underwriting, and claims systems is complex and time-consuming. And though the information within a carrier constitutes an enterprise's core, all too often that data lies isolated within disparate back-end systems. Whether your company needs to integrate disparate systems or integrate data enterprise-wide due to mergers and acquisitions, the need for a solid technology that integrates disparate systems is compelling.

Integrating data for better access improves a carrier's efficiency, decision-making, and data management capabilities. Sharing information among applications and commonly used back-end systems increases the speed and effectiveness of a carrier's decisions. Seamless, real-time information exchanges reduce costs, generate new business, and promote successful transactions across all lines of business. Insurance Systems Integration Accelerator—in unison with Adeptia's Business Process Management Server, Adeptia Integration Server, and Data Transformation Server—provides those capabilities.

Insurance Systems Integration Accelerator works within your firewall to integrate and permit the sharing of crucial information. The re-keying of information "stranded" in inaccessible systems is eliminated. The resultant timely and comprehensive access to information improves reports and that leads to better decision-making. This desirable scenario is a reality thanks to Insurance Systems Integration Accelerator's features and benefits, and the good news is you can implement it quickly and easily, up to 75 percent faster than custom coding.

### INSURANCE SYSTEMS INTEGRATION ACCELERATOR:

- Bridges data between policy management and all key systems
- Bridges data between systems and key data sources
- Supports data transfer, transformation, and conversion
- Increases processing across information silos
- Creates a foundation for a service oriented architecture (SOA)
- Creates web services
- Supports merger & acquisition strategies

Manage, Automate, Optimize Business Processes

### ACCELERATORS' BUSINESS BENEFITS

- **SPEED** - Rapid implementations and a faster way to get products to market
- **EASE** - Collaborative and code-free platform for business & IT personnel
- **SCALEABLE** - Pay for what you need now, invest along with business growth

### FEATURES AT A GLANCE

- Process sharing templates
- Pre-defined adapters for many commonly used policy management, claims, and rating systems
- Pre-defined industry standards such as ACORD AL3 and XML
- Code-free approach

### BUSINESS VALUE AT A GLANCE

- Faster access to timely information
- Improve time to market and business flexibility
- Enhanced view of enterprise data
- Improve decision making and reporting
- Improved SOX compliance
- Integrated branch operations
- Eliminate manual re-keying of data – improves data quality

### ADEPTIA ACCELERATOR IMPLEMENTATION ADVANTAGES

Flexible Pricing, Speedy Implementation, Faster Deployment, Low Risk

### ACCELERATOR BREAKTHROUGH:

Business units can now write process solutions collaboratively with IT in a fraction of the time custom coding requires. Adeptia's groundbreaking technology lets business and technical users collaborate to create much-needed business processes. Solutions to business problems result quickly and efficiently.

### ADEPTIA INSURANCE ACCELERATORS

Business Process Management for Insurance ■ Agency Carrier Interface ■ Insurance Carrier Portal ■ Insurance Systems Integration ■ Partner Integration
